Professional Summary

Java backend developer with experience maintaining and extending Java/Spring Boot applications, fixing defects and writing automated tests. Independent project experience with REST APIs, PostgreSQL, Spring Security and Docker. Uses AI coding agents with code review and test validation. Authorized to work in Germany.

Technical Skills

Backend: Java, Spring Boot, Spring Security, REST APIs, Spring Data JPA, Hibernate, JDBC

Databases: PostgreSQL, MySQL, SQL, Liquibase

Testing: JUnit, Mockito, Testcontainers, Selenium

Tools / CI/CD: Docker, Maven, Git/GitHub, Jenkins, Linux, IntelliJ IDEA

Frontend (basic): TypeScript, HTML, CSS, Thymeleaf

AI-assisted development: Coding agents, task/context preparation, review of generated changes, test validation

Work Experience

Java Backend Developer — FOP Arnautov S. A.

July 2025 – July 2026 · Full-time · Remote · Company based in Ukraine

- Developed a sales-reporting module in a Java/Spring Boot application with LLM-powered sales and competitor analysis for configurable product selections, automating report processing and recommendation generation.
- Refactored backend code and wrote automated tests to verify behaviour and cover changes. Used Docker for the application and supporting development services.
- Used AI coding agents for implementation, debugging, refactoring and test development; reviewed generated changes and validated results through automated tests.

Independent Java Backend Development

February 2024 – June 2025 · Aschaffenburg, Germany

Developed and maintained Java/Spring Boot applications with PostgreSQL, REST APIs and Spring Security. Used Docker and Jenkins for development/deployment workflows and Git/GitHub for version control.

Selected Projects

Authentication & User Management Service — Java / Spring Boot

Authentication and user-management application with Java, Spring Boot, Spring Security and PostgreSQL. JWT-based authentication, Google OAuth2 integration and role-based access control; automated testing with JUnit, Mockito and Testcontainers, with Docker-based development and deployment workflows.

Earlier Experience

Relocation to Germany and Professional Integration

May 2022 – February 2024 · Aschaffenburg, Germany

Relocation to Germany, intensive German-language learning and professional reorientation; part-time work in hospitality during this period.

IT Support & Website Maintenance — E-Commerce Freelance

March 2020 – March 2022 · Mariupol, Ukraine

- Created, hosted and maintained a WordPress website; automated product listings across approximately 10 platforms.
- Increased annual online orders from approximately 1,200 to 4,000; implemented inventory management and database reporting for sales and orders.

Logistics and Data Operations Manager — STT LLC

August 2015 – March 2020 · Mariupol, Ukraine

- Converted manual records into structured data and database reports; worked with IT teams on digitalization, data maintenance and process improvements.

System Administrator — IT Service Provider

September 2010 – August 2015 · Mariupol, Ukraine

- Maintained IT infrastructure, networks and Windows/Linux environments; provided technical support and monitored network reliability.

Education and Training

EPAM — Introduction to Java, 2023

JavaRush University — Java Developer Program (training), January 2022 – July 2023

Pre-Azov State Technical University, Mariupol — Bachelor's degree in Welding Engineering Technology/Technician, 2010–2013
