PROFESSIONAL EXPERIENCE

July 2025 – July 2026 · Full-time · Remote

Java Backend Developer | FOP Arnautov S. A.

- Developed a Java/Spring Boot sales-reporting module with LLM sales and competitor analysis for configurable product selections, automating report processing and recommendations for a Ukraine-based company.
- Refactored backend code; wrote automated tests and used Docker.
- Used coding agents with code review and test validation.

Feb 2024 – Jun 2025 · Aschaffenburg, Germany

Independent Java Backend Development

- Developed and maintained Java/Spring Boot applications with PostgreSQL, REST APIs and Spring Security.
- Used Docker and Jenkins for development/deployment workflows and Git/GitHub for version control.

May 2022 – February 2024 — Aschaffenburg, Germany

Relocation to Germany and Professional Integration

- Relocation to Germany, intensive German-language learning and professional reorientation; part-time work in hospitality during this period.

2020 – 2022 — Mariupol, Ukraine

E-commerce Freelance | IT Support & Website Maintenance

- Created and maintained a WordPress website; automated product listings across approximately 10 platforms.
- Increased annual online orders from approximately 1,200 to 4,000; implemented inventory management and database reporting.

2015 – 2020 — Mariupol, Ukraine

STT LLC | Logistics and Data Operations Manager

- Converted manual records into structured data and database reports; worked with IT teams on digitalization, data maintenance and process improvements.

2010 – 2015 — Mariupol, Ukraine

IT Service Provider | System Administrator

- Maintained IT infrastructure, networks and Windows/Linux environments; provided technical support and monitored network reliability.

SELECTED PROJECTS

Authentication & User Management Service — Java / Spring Boot

- Personal project: Java/Spring Boot, Spring Security, PostgreSQL; JWT, Google OAuth2 and roles. Tests: JUnit, Mockito, Testcontainers. Docker workflows.

Garda Agent Orchestrator — Open-Source Developer Tooling

- Open-source Node.js/TypeScript CLI for controlled coding-agent workflows: task lifecycle, quality gates, reviews and auditable task history.
